

Systems Biology Seminary

Systems Biology Seminars (Progress Reports Department of Systems Biology) will be held every Friday and on some Mondays 9 a.m. in the seminar room 2nd floor.

Guests are welcome.

Topics

13.06.2014

- Berno Dalichau, tba
- Matthew Hurd, tba

06.06.2014

- Bsc. Søren Lentz, Information theoretical analysis of IL-6-induced JAK/STAT signalling
- Bsc. Oliver Klepsch, JAK2-V617F effects on dynamics of cytokine signaling

02.06.2014

- MSc. Hannes Bongartz, MAPPIT Interactome Analysis reveals insights into the intramolecular interaction between Ser552 and the PH domain of Gab1

26.05.2014

- MSc. Mehul Gautam, tba

23.05.2014

- Dr. Anna Dittrich, Regulation of SOCS3 expression by glucocorticoids – a novel mechanism to induce dendritic tolerance?
- Dr. Wiebke Hessenkemper, Dynamics and interrelation of JAK2-V617F activated signaling pathways
